

Annual Report

FY2025

Strengthening Communities Through
Energy and Resilience

Statement from the CEO

Strengthening Communities Through Energy and Resilience

FY2025 brought significant transition. Shifts related to the Greenhouse Gas Reduction Fund, the rollback of tax credits, and broader lack of support led to uncertainty across the industry. Yet these moments also highlight the importance of experienced, community-rooted institutions that are built to navigate complexity and remain focused on long-term impact. While circumstances may have changed, these awards affirm **confidence in SELF's proven model and readiness to deliver.**

In FY2025, that confidence was reinforced through continued investment from philanthropic and financial partners. Our core programs, such as SAGE, which supports nonprofit and community-based housing developers, continued to expand, reflecting a need for mission-driven capital.

We closed the year with SELF **deploying over \$15 million in total loans**, marking the highest annual lending volume to date. SELF's **seven Plug and Play partners** deployed **\$4 million in home improvement loans** for resilience, solar, and energy-efficiency improvements. Cumulatively, SELF has now deployed **\$60 million in financing** through more than **4,400 projects**, supporting over **12,000 people** in reducing energy and insurance costs while improving safety, health, equity, and financial inclusion.

I am profoundly grateful to those who understood the moment, endured the uncertainty, and continued to push forward, and to the **partners and supporters who stood with us during truly difficult times.**

I often say that we trained for the Olympics, and the Olympics were canceled. But the strength, discipline, and dexterity built through that training cannot be taken away. As we enter FY2026, we do so with optimism and purpose, in strong shape, and ready for what's next.

#Manos à la Obra!

Duanne Andrade
Chief Executive Officer

Statement from the Founder and Director of National Expansion & Partnerships

SELF's National Expansion Accelerates Across the U.S.

FY2025 marked a pivotal year for **SELF's nationwide growth**, expanding its presence to **17 states and Washington, D.C.**, and bringing equitable clean energy and home resilience financing to nearly half of the U.S. population. Through collaborations with thirteen Green Banks, CDFIs, and NGOs, SELF's **Plug and Play** program is empowering underserved communities to access affordable financing for essential home repairs and upgrades.

The organization's original seven Plug and Play partners exceeded their annual goals, closing **\$4 million in loans** and experiencing a remarkable **300% year-over-year increase** in lending activity. Additionally, SELF finalized a national RFP process and selected six new PnP partners and expanded its reach to serve six more states.

This rapid national growth underscores the **strong demand for SELF's products and services**, as well as the scalability of its Green CDFI model, which effectively bridges the gap in affordable, accessible green financing for low- and moderate-income (LMI) homeowners. SELF continues to demonstrate that equitable climate finance can be both **impactful and sustainable, empowering families, strengthening communities, and advancing resilience** across the nation.

About SELF

SELF is proud to be **America's first nonprofit Green Bank and a U.S. Treasury-certified Community Development Financial Institution (CDFI) hybrid**. Our mission is to democratize access to healthy, resilient, and sustainable communities, through mission-driven, innovative financing that supports energy efficient and resilient homes, businesses, and community facilities. We focus on energy efficiency, storm resilience, solar energy and batteries, and more, that help **reduce operating costs, improve health and safety, bolster resilience, promote equity**, and foster more sustainable communities nationwide.

Our Impact Over 15 Years:

- **Financed over \$60 million in projects**
- Supported more than **12,000 individuals and families**
- **70%** of those served are low- and moderate-income (LMI) households
- Maintained an impressive **default rate of just 2%**
- Proven that **underbanked communities are creditworthy**

Our Primary Lending Programs:

Green Home Loans (GHL):

GHL is our flagship program, designed with inclusive, ability-to-pay underwriting that enables LMI homeowners to access **affordable financing for essential home repairs and upgrades**. Through our Plug and Play initiative, GHL has expanded to 17 states and the District of Columbia, partnering with 13 organizations. The PnP program provides partners with access to SELF's turnkey Fintech platform, offering underwriting, loan servicing, capital, training, technical support, and strategic guidance.

Housing and Community Impact (HCI):

HCI programs support small and mid-sized **affordable housing developers, nonprofits, landlords**, and for-profit organizations through the SAGE and SEER programs. We also collaborate with established CDFIs to scale larger projects. In addition to retrofitting and constructing new affordable and workforce housing developments, HCI finances upgrades for non-residential buildings, including churches, farms, businesses, and commercial properties.

Mission

SELF's mission is to democratize access to healthy, resilient, and sustainable communities, through mission-driven, innovative financing that supports energy efficient and resilient homes, businesses, and community facilities.

Vision

Our vision is to be an important part of creating thriving and sustainable communities across the nation.

FY2025 Year in Review

FY2025 was one of our most challenging years to date, marked by significant policy changes that led to widespread negative impacts, including the loss of major federal grants to SELF and many of our partners. Climate change, inflation, and economic uncertainty further intensified these challenges for our target markets, as evidenced by major hurricanes, prolonged heatwaves, and rising costs in housing, energy, food, and insurance premiums.

Despite these many obstacles, SELF demonstrated resilience and innovation. We achieved record-setting lending activity and forged new, robust partnerships. We **surpassed \$15 million in lending**, setting a new annual high, and assisted another **3,000 individuals**. Additionally, we strengthened collaborations with local governments in Florida to enhance community impact and expanded our reach nationally through thirteen PnP partners.

This year also saw significant strategic technology advancements. We enhanced our fintech platform by automating processes, streamlining workflows, and refining pre-approvals to reduce barriers, increase efficiency, and improve the client experience. Moreover, we launched CanopyClimate, a free online tool that helps homeowners identify rebates and tax credits and plan smart, energy-efficient, and resilient home improvements. This further expands access to vital information and empowers informed decision making.

Program Highlights

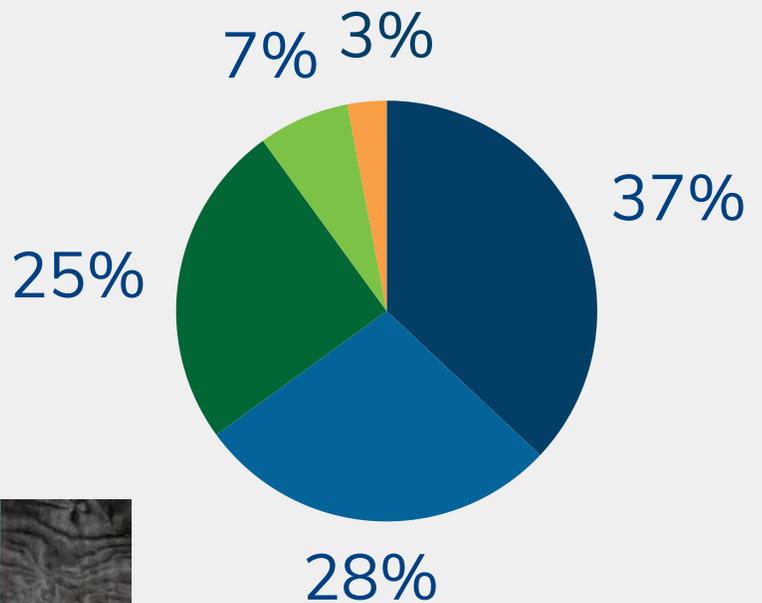

Green Home Loans

In FY2025, SELF's Green Home Loans program continued to be a cornerstone of our mission, surpassing **\$10 million in lending** for the first time. This achievement underscores strong demand from low- and moderate-income households for fair, inclusive financing that supports essential home repairs and improvements, thereby enhancing health, safety, comfort, quality of life, home equity, and generational wealth.

Through the GHL program, SELF empowered nearly 1,000 homeowners to invest in energy efficiency, storm and energy resilience, and critical health and safety upgrades. These investments included solar and battery systems, HVAC improvements, impact windows, insulation, hurricane mitigation, storm recovery, disability modifications, and water and sewer infrastructure projects.

Loan Products:

- Wind Hazard Mitigation
- Solar PV & Batteries
- Energy Efficiency
- Septic-to-Sewer
- Hurricane Relief

Testimonial:

"This was the best experience I have ever had with a program, and I look forward to working with SELF again in the near future. Thank you so much for the kindness you showed me. I feel truly blessed. I searched everywhere for help and couldn't find any answers until God led me to your site. Calling SELF was the best decision I made in 2025."

-Jeldrine

Solar and Battery

SELF's Solar and Battery Lending Program achieved a record-breaking year in FY2025, deploying over **\$4.6 million in new solar loans** with strong support from our Plug and Play partners. This milestone marks SELF's strongest annual solar performance to date, with loan closings increasing 3.6 times compared to the previous year and total production reaching 117% of the annual goal.

FY2025 Solar Program Highlights

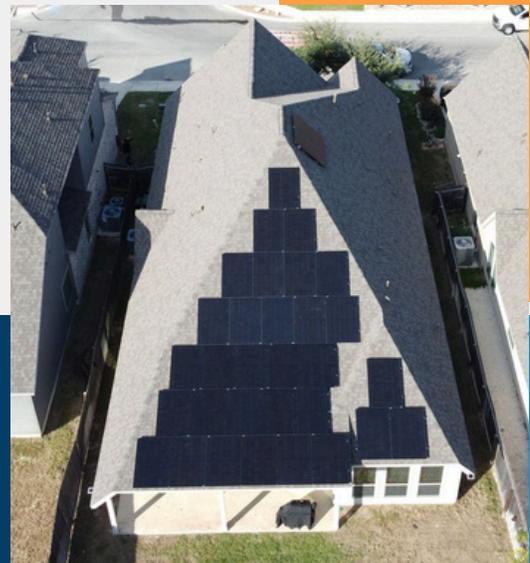

- **143 solar and battery loans closed**, averaging **\$32,288** per project
- **60% battery attachment rate**, particularly after Hurricanes Helene and Milton
- **1,300 kW installed, offsetting 1,358 metric tons of CO₂**, equivalent to 3 million vehicle miles driven
- **35% of loans served LMI households**, and **54% qualified under CDFI guidelines**

The expiration of the federal residential solar tax credit in 2025 underscores the importance of innovative approaches to making solar and battery storage accessible and affordable for all homeowners. Despite this change, SELF remains dedicated to advancing energy equity through strategic partnerships, community education, and mission-driven lending initiatives. These efforts will continue to empower historically excluded communities, expand energy resilience, and promote sustainable clean energy solutions in the years ahead.

Testimonial:

"After a divorce left me with significant debt, I worked for years to pay it off. Just as my wife and I bought a new home, she unexpectedly lost her job, creating new financial strain, racking up the credit cards again and the vehicles going in some late payments. She has a job again so things are getting better. I had solar panels in my previous home so I know how important it is to have them so I wanted them again right away."

-Josue

Housing & Community Impact

In FY2025, SELF's Housing & Community Impact (HCI) programs continued to fill vital financing gaps in under-resourced communities by supporting emerging developers of affordable/workforce housing, small businesses, non-profits, churches, and family-owned farms. Utilizing low-cost and catalytic loans, these programs enabled the retrofitting and construction of new housing and various building and property improvements, while promoting energy efficiency, storm resilience, and solar projects in the Southeast.

Affordable Housing Development

- Six loans were closed in FY2025, totaling **\$5.2 million financed**, including **\$2.8 million** to emerging developers under SELF's SAGE loan program
- **\$1.4 million** approved for early FY2026 closing
- **100% CDFI investment areas**
- **Seventeen certified** "Florida Green Home Bronze" units
- **Five units** are slated for National Green Building Standard certification
- SELF closed \$2.4 million in a partnership structure for Villa L'Onz in Riviera Beach, FL, initiating the **first phase with 12 units**. This project will pave the way for a **full buildout of 150 units**, significantly advancing affordable housing in the area.
- The Affordably Lavish Foundation completed **seven 80% AMI homes** in Lehigh Acres, FL

Commercial Impact Lending

- Six loans closed in FY2025, totaling \$361,000, supporting solar and roofing for farms and small businesses.
- SELF closed its first-ever Investment Tax Credit (ITC) bridge loan and permanent solar loan totaling \$201,672 for 4L Farm LLC, a rural, family-owned poultry operation in Rutledge, Georgia. This financing supports a 109.7 kW ground-mounted solar system that supplies 77% of the farm's energy needs. (pictured below)

Villa L'Onz, Riviera Beach, FL Highlights

- Planned units are destined for a mix of homeownership and rentals, preserving housing in a historically working-class neighborhood, just 2 blocks from the fast-developing marina district.
- The Community Redevelopment Agency in Riviera Beach, the CDC's parent organization, is partially financing the development. SELF agreed to finance the initial 12 homeownership units to build momentum in the larger development.

Pictured above are Riviera Beach Community Development Corporation Executive Director Annetta Jenkins and ground-breaking master of ceremonies Dwayne Bryant. They participated in the groundbreaking ceremony for Villa L'Onz, an affordable housing development in the thriving Marina District.

“Affordable/workforce housing for home ownership is almost impossible to do these days, but SELF got it done. They clearly understand the needs and challenges of small developers.”
- Annetta Jenkins

Plug and Play Program

In FY2025, SELF's national expansion reached a major milestone, adding 6 more states and extending its services to **17 states and Washington, DC**, and providing Green Home Loans to nearly half of the U.S. population. Through its network of 13 mission-driven partners, SELF's Plug and Play (PnP) program supports emerging lenders in launching tailored programs efficiently and cost-effectively, aligned with local community needs.

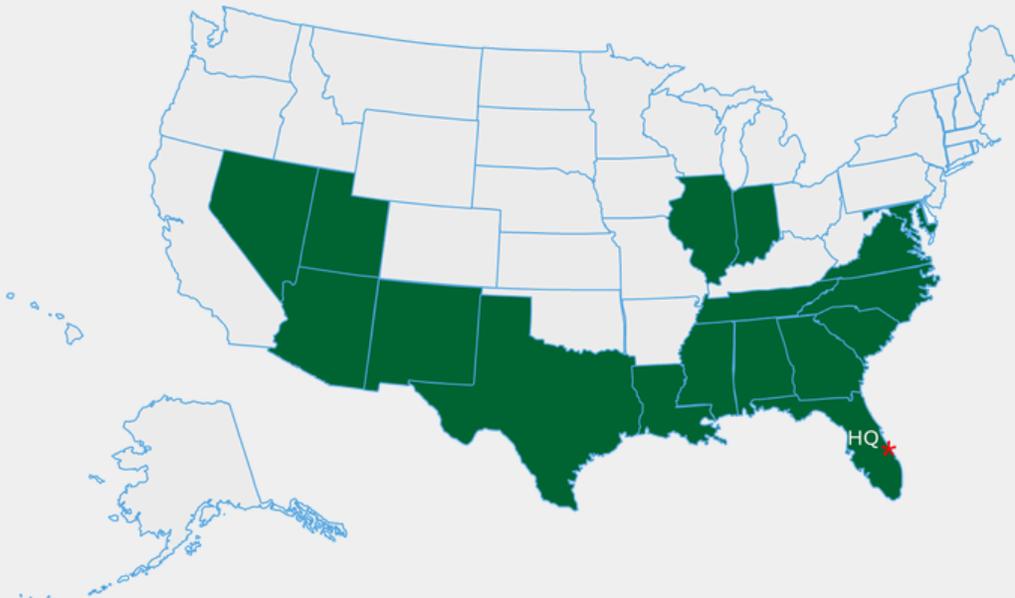

Key achievements for the year include:

- Onboarding of **6 new partners**, bringing the total active partners to 13
- Facilitating **\$4 million in loans** across 10 states
- Achieving a 300% year-over-year growth in loan volume

PnP partners benefit from access to SELF's advanced fintech platform, inclusive underwriting, loan servicing, and comprehensive support, including training, technical assistance, and capital. This integrated approach lowers barriers, accelerates the deployment of mission-aligned financing, and boosts the impact of clean energy and resilience projects nationwide.

These partnerships set the stage for continued expansion and impact in the future.

Kiva Highlights

SELF is an approved field partner with **KIVA.org**, successfully raising \$201,000 in FY2025 through global crowdfunded loans. Our partnership is committed to empowering women, veterans, low-income homeowners, and individuals with low or no credit scores. These groups that often face significant barriers to accessing financial support.

Many of these families are frequently denied assistance by traditional banks due to low credit scores, yet they urgently need essential home repairs and enhancements such as safe roofs, functioning air conditioning, accessibility upgrades, and more.

Through KIVA.org, more than one million people worldwide invest \$25 or more to fund high-impact loans, offering our lowest interest rates. This crowdfunding support enables SELF to say “yes” to homeowners who might otherwise hear “no.”

Together, Kiva and SELF have made it possible for 21 families facing significant barriers to receive the repairs and energy upgrades they need to live safely, efficiently, comfortably, and with dignity.

FAMILIES HELPED

CanopyClimate

In mid-2025, SELF proudly launched CanopyClimate, a free web-based tool that helps homeowners plan and complete green home improvements with confidence. The platform provides **personalized recommendations**, identifies all applicable rebates and tax credits, and connects families with locally qualified contractors who can get the job done right. By integrating financing options with rebates and trusted contractor networks, CanopyClimate makes solar and energy efficiency upgrades more **accessible and affordable** for households across our communities.

Plan smarter home upgrades — for free.

- ✔ See which energy upgrades will **lower your bills** the most
- ✔ Compare **real upgrade costs** with long-term savings
- ✔ Find **rebates, tax credits, and local incentives** you qualify for
- ✔ Explore **affordable financing options**, including nonprofit lenders
- ✔ Estimate your **carbon footprint reduction** before you invest

No subscriptions. No lender obligation.
Just clear costs, savings, and options.

Testimonial

"I want to thank the team at the Solar Energy Loan Fund (SELF) for their professionalism and support in turning the disaster caused by Hurricane Milton into a manageable experience. I retired six years ago to become a full-time caregiver for my adult daughter with disabilities. At 76 years old, living on a fixed income leaves little room to plan for back-to-back disasters or the many challenges life can bring. When our home insurer left Florida, we could not afford coverage elsewhere, and the strain quickly added up.

This has been one of the hardest years of my life from the rising cost of care and keeping our aging car running to maintaining a home that was already under construction before the hurricane. Through it all, our partnership with SELF has been essential. We are deeply thankful, because without our SELF loan, we may have lost everything. Our home and our stability were made possible because of SELF."

-Diana

Contractor Highlights

Contractors are essential partners in SELF's mission, serving on the front lines by connecting homeowners to SELF's services. In FY2025, **inclusive, low-cost financing with no dealer fees** helped contractors reduce project costs and expand access to more low- and moderate-income communities. Through a growing network of over 1,200 trusted contractors, SELF strengthened local businesses, supported job creation, and contributed to **thriving, resilient communities**.

-Marjie

Financial Highlights

In FY2025, despite many external challenges, SELF continued to demonstrate **strong financial health and disciplined growth**.

Total assets increased to nearly **\$34 million by year-end, up \$8.2 million from FY2024**. This growth demonstrates to investors and partners that SELF remains a reliable, well-managed CDFI, fully prepared to leverage private impact capital and philanthropic support to expand access to safe, affordable property improvement financing.

Together, these results **highlight a financially resilient organization positioned to advance SELF's mission** of creating healthy, resilient, and sustainable communities.

Board of Directors

SCOTT McCracken | President

Scott has nearly four decades of experience in construction and has been a state certified general contractor since 1989. He is also the past President of the Treasure Coast Builders Association and received the distinction of “Builder of the Year”. Scott has been a certified member of Green Advantage since 2008 winning a number of awards for green building projects.

SUSAN GLICKMAN | Vice President

Susan is the Florida Director of the CLEO Institute and has served as a consultant to leading national organizations, including the Natural Resources Defense Council, Ceres, Advanced Energy Economy, the Union of Concerned Scientists, Physicians for Social Responsibility, Vote Solar, Clean Energy Group, Environmental Defense Fund, and the Clean Air Task Force. Her work supports climate and energy policy efforts.

BOB CAMBRIC | Treasurer

Bob is an urban planner with over 30 years of experience in public policy, growth management, community redevelopment, economic development, and consensus-building. He holds a Master of Science in Planning and a Bachelor of Arts in International Affairs from The Florida State University, bringing decades of expertise in planning and implementation.

LIZ GUTIERREZ | Board Member

Liz is the Chief Executive Officer of Enterprising Latinas, Inc., advancing opportunities for Latinas in the Tampa Bay region of Florida through skills development, network building, and advocacy for economic mobility and equity. She holds a master’s in community economic development and has 20 years of experience in neighborhood planning and revitalization.

Board of Directors

DANA CLARE REDDEN | Board Member

Dana is the founder of Solar Stewards, a social enterprise linking corporate social responsibility initiatives with historically excluded communities. With over a decade in the solar industry, Dana is a dedicated solar energy professional passionate about advancing distributed generation solar projects globally.

VALERIE DEKLE SLACK | Board Member

Valerie is an award-winning architect with expertise in safety assessments, sustainability, and LEED-certified buildings. As founder and principal of Native Design in Fort Pierce, Florida, she serves a diverse commercial clientele and is recognized for her innovative, forward-thinking approach to architecture and design.

BRUCE SCHLEIN | Board Member

Bruce is Director and Head of Sustainable Investing at OMERS Infrastructure, leading global ESG strategy and integration. He partners with Boards and management to enhance ESG performance, capital allocation, and deal origination. He holds a BA from Cornell and an MA in International Economics from Johns Hopkins SAIS.

CLAIRE RALEY | Board Member

Claire is a performance-driven leader with expertise in corporate community affairs, CRA, philanthropy, CSR, affordable housing, and community health. She retired as SVP, CRA/Community Development Officer at BankUnited, serves on two CDFI boards, and continues volunteer work supporting nonprofit and community development initiatives.

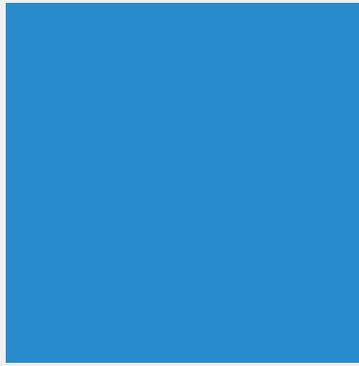

Testimonial:

“This was a great experience. There were significant deaths in my family, which led to increased expenses to travel out of state, and I also had major home repairs that needed to be addressed. I am a survivor of domestic violence and took over my home without the help of my ex, who left me with many payments to catch up on.

-Lana

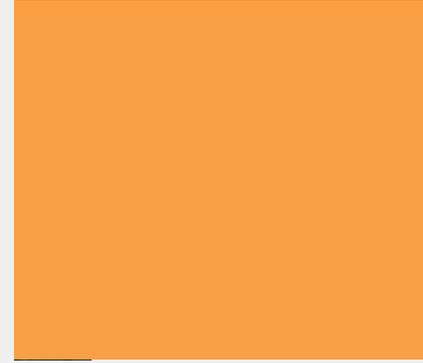

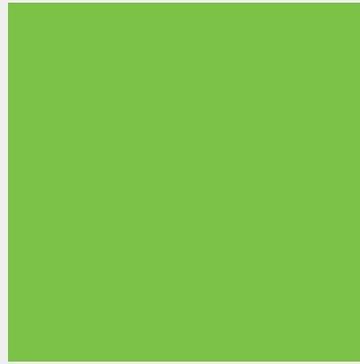

Testimonial:

Thank you so much for all the extra help you provided us. We are very satisfied with the roofing job. As senior citizens living on a fixed income, we would not have been able to afford a new roof otherwise, and we are truly grateful.

-Wayne

Thank You

As we celebrate our achievements in FY2025, SELF looks forward to 2026 with renewed energy, continuing to expand access to affordable, resilient, and energy-efficient home and community solutions for families and communities across Florida and beyond.
